

To Whom it may concern:

I am pleased to offer my recommendation for Mark Andrews work on Georgia-Pacific's Paper Machine rebuild and new converting plant at Port Hudson, LA. Mark has provide leadership and technical support for a team of Alignment Specialists whose work included initial equipment layout, QA/QC work on anchor bolts/structures, precision alignment of large machinery and verification and documentation of all types of equipment installations and piping. Mark has demonstrated a very high level of proficiency and technical expertise in these areas of responsibility. I would highly recommend Mark Andrews for this work and we would welcome him as an addition to our team on future projects. Mark also clearly understands the balance between perfection and making a profit and has demonstrated the business perspective required for successful projects. Please feel free to contact me for further information.

Sincerely,

Howard C Irwin
